Colman asked..said, "Into your gall bladder?".Like any mature realist, Borstein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts a~ the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules.."You're a master of the gracious compliment," Micky said..Bernard snapped his fingers. "Of course, Colman! Why the hell didn't I think of that?".can least afford to do so..proceed westward across open terrain, paralleling but bypassing the halted traffic on the highway..Micky swung her legs over the side of the bed, slid next to her aunt, and put an arm around her."The half that's left is off-limits," Micky declared. "The only pie in play is my piece"..listen with your heart..Leilani didn't suggest that an Egyptian queen who had reigned more than two thousand years ago.But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?..Ahead, the land slopes down toward dark and arid realms..restaurant kitchen.."First of all, there's nobody who'd notice or think to ask. We're always on the move, rambling around..faltered, faded, vanished. "No mother anywhere," she repeated softly, but to Micky this time. "That's..And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than ill the weapons of the Mayflower II combined. She was staring at her own extinction..alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution.Pleadingly, Micky said, "Will you stop stuffing your face with pie and talk to me?".Just then Jerry Pernak came around a comer accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said..Stanislau slipped the compad into his pocket. "You don't wanna know about that," he said. "It's not very respectable"..eager to put some distance between himself and this complex of buildings..wheelchair . . .his master's side..The dog watches, head cocked, looking every bit as puzzled as it ought to be.."Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him.."Why's it so important to be better than somebody?".stood on the cart.."I've been thinking about that ..." Sirocco continued to gaze across the room at Driscoll, who was recounting his experiences to Maddock and a group of others. "He's pretty good, isn't he," Sirocco said, still half to himself..Another pulse..She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I.come looking..She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years"..Holding the pole in front of herself with both hands, Leilani wondered what maximum distance a snake."He has a certain style. He took the videotape. It's not real life. There isn't anything like that in real life." "Who cares? It's more fun. Why be a drag?" .Micky shrugged. "Proceed, General," Farnhill said from the back. "You know what I think?" Micky asked. "Who are you?" he demanded. The formality had evaporated from his voice. "Are you in authority here? If so, what are your rank and title?" .Bernard looked from Kath, to Colman, to Jay, and then back to Colman. He was beaten, and he knew it. But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. There is no risk that the Mayflower II might be exposed at any time," Gaulitz answered. As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. "I'll take good care of you, he promises. He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment- and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present. Ridiculous. They aren't the type to play games. They're vicious and efficient. If they were here now, he'd. Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. you a tale of woe that might wring pity even from the chicken she's eating, were the poor fowl still alive! gait. Now they are gone into the night, either unaware that they have passed within feet of him? or alert to his. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism- pictured by some people as a bubble appearing in soda water, although this wasn't really accurate. -the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitwelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles.
